Art Unit: 3653

1. The indicated allowability of the subject matter of claims 2, 5, 11, 13, 16, 25 and 26 is withdrawn because the examiner failed to fully understand what the reference to Miller '681 discloses and that Farquhar shows the tear lines extend into connected side wall panels. Specifically, the feature of a finger hole in communication with a tear line to facilitate commencing opening of a dispensing opening. Rejections applying the teaching in Miller '681 of a finger hole and the extent of the tear lines in Farquhar follow.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2 through 21 and 25 through 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farquhar in view of Miller '681 both of record.

Farquhar teaches everything including tear lines (near 26) which extend into connected side wall panels (see Fig. 1 and Fig. 2), but does not teach the carton having at least one arcuate corner with an aperture at a juncture of the arcuate corner with a side of the carton and a finger hole in communication with the tear line to facilitate commencing opening of the dispensing opening.

Miller '681 teaches such a dispensing carton with at least one arcuate corner 58 (see Fig. 3 and Fig. 5) with an aperture on each side of each arcuate corner.

Miller '681 also teaches providing a finger hole 75 in communication with a tear

line to facilitate the opening of a dispensing opening in the carton (see column 6 line 15).

It would have been obvious to one of ordinary skill in the art to provide the carton of Farquhar with at least one arcuate corner with apertures at the arcuate corners and provide a finger hole in communication with the tear lines to facilitate opening of the dispensing opening.

4. Claims 22 through 24 are allowed.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
